PROJECTS

TO DO APP

A simple react JS application to keep track of one's activities. Firebase is implemented for authentication purpose and for storing data, making use of its Realtime Database. Custom hooks are used to interact with firebase database.

SOCIAL MEDIA APP

A Facebook clone where users can create accounts to post status and photos. Redux is used for state management and Material-UI designs are used. Authentication is done by JWT stored inside an HTTP Only cookie. Express JS server is used and mongo DB cloud Atlas database is connected using Mongoose.

CHAT APP

A chat app created with express JS and Socket IO. Users can enter the chat room with a unique username thus enabling real-time, bi-directional communication between web clients and servers.

MOVIE FINDER APP

A website here one can search for movies and provide ratings. The web app is made using Vanilla JavaScript with HTML and CSS. The app makes use of the OMDb API: The Open Movie Database.

EXPERIENCE

Operation Executive

Core Integra Consulting Services Pvt Ltd & deputed at Client (Tata Consultancy Services ION) location from 2015 to 2019.

Profile

I am a web developer with one plus years of experience seeking an opportunity to use my web development skills and knowledge.

I love learning new tools and, in the process, I developed coding skills for building dynamic web applications and websites.

Visit my portfolio website to find projects that showcase my skills and general background in developing
